

Range, Mean, Median, and Mode

by Kathleen Wiley

Range, mean, median and mode

Are confusing, so I have been told...

But if I may be so bold...

They're not confusing when you know....

**The *range* is the difference between
The greatest number and the least....**

The *average* of numbers is the mean....

The *mode's* the one most often seen...

The *median's* the middle one...

And now our song is almost done....

So if you want to have some fun...

Choose math...the best thing under the sun!!
