

The Measurement Song

by Kathleen Wiley

A millimeter's a tiny measurement
A centimeter's bigger they say...
But it's a cinch
The little inch
Is much, much bigger than they.

Twelve inches makes up a foot, I know..
And three feet make a yard
But you'll be the leader
If you've got a meter
'Cause 39 inches is hard.....to beat!

Now we've got a much longer measurement
And hearing it might make you smile...
But 5,280 feet
Exactly makes up a mile!!!
