by Kathleen Wiley

When conjugating verbs....  
It's something so predictable...  
It's often the same thing...  
The pattern's seldom fickle...

The tenses each verb has.....  
Are all in one condition..  
The PRESENT is the first...  
It's where we now are living...

I am  
You are..... the singular... This you means only one  
He is  
She is  
It is...  
The singular is now done....

We are  
You are..... the plural  
This YOU means 2 or twenty.  
And then comes they..... it's plural...  
This they means 2 or many.

The PAST tense each verb has...  
They're all in on condition  
The past means yesterday....  
So we are no more living it...

I was  
You were..the singular  
This you means only one  
He was  
She was  
It was...  
The singular is now done....

We were  
You were..... the plural..  
This you means 2 or twenty....  
And then comes they..... it's plural.  
This they means 2 or many..

The FUTURE tense each verb has..  
They're all in one condition...  
The future is not yet....  
We have no guarantee of it....

I will  
You will..... the singular  
This you mean only one...  
He will  
She will  
It will  
The singular is now done.....

We will

And then comes they..... it's plural.
